MONOPOSTO/BIPOSTO® CARRIERS BY MAY™

Monoposto/Biposto marching carriers by MAY ensure complete freedom of movement, in complete ergonomic comfort. The Monoposto/Biposto bridge transfers all shear and torque load away from the abdomen plate while the Articulating Back Support (ABS™), Contour Hinge™ and multi-axis shoulder adjustability conform to all body types, yielding the ultimate in stability, control and comfort.

ALUMINUM TUBE CARRIERS BY MAY™

Aluminum Tube Carriers by MAY feature simple, ergonomic lightweight design. This patented design is ideal for comfort and is fully adjustable to fit all students from smallest to largest. Extended torso adjustment and full shoulder rotation facilitate comfort while the sturdy aluminum construction insures strength and durability.

AIRLIFT STADIUM HARDWARE BY MAY™

Integrated with an innovative air suspension system, the telescoping tube glides up and down effortlessly ensuring easy, instant set up and positioning of your instrument. A single leg can adjust independently of the other two legs to ensure stable support of the instrument whether on the field or in the stadium stands. The Drop and Lock Technology integrates with MAY carriers for instant mount and dismount from carrier to corresponding Stadium Hardware Stand.

M AIRLIFT™

RANDALL MAY INTERNATIONAL

MAY AIRlift Stadium Stands are integrated with an innovative air suspension system that counters the weight of the drum. The telescoping tube adjusts up and down effortlessly ensuring easy positioning of your instrument.
